

## THIRD PARTY THREAT MANAGEMENT

# Continuous, Actionable, No- Noise Vendor Monitoring

## Partnered with Innovative Organizations

## Never miss another third-party data breach.

HackNotice's Third Party Threat Management service provides continuous, real-time cybersecurity monitoring of your entire supply chain, proactively identifying data breach threats and dark web exposure levels within your extended business ecosystem.

We deliver actionable, real-time alerts for vendor data breaches, cybersecurity incidents, sensitive third-party data exposures, and threat actor activities aimed at your supply chain, significantly improving your third-party risk monitoring and accelerating your incident response capabilities.

### Continuous Monitoring, Actionable Alerts

- ✓ **Cost-effective surveillance of your entire supply chain and instant breach/ransomware event notifications.**
- ✓ **Insight into data breach and ransomware patterns by geography, industry, and more.**
- ✓ **Gain foresight into potential incidents with detection of dark web anomalies tied to vendors.**

#### Early Detection and Rapid Response

Time to knowledge is critical with third party incidents. Learn about breaches to your supply chain in real-time, allowing for faster incident response to mitigate potential damages.

#### Improve Vendor Reviews & Onboarding

Don't rely solely on vendor questionnaires. Receive direct insights to vendor risk profiles and breach histories for any company, ensuring compliance and defense against third-party risks.

#### Customized Alerting Tailored To You

Reduce alert fatigue and wasted time by only being notified on actionable events. Tailor your alerts and workflows based on vendor criticality, event types, and more.

#### Uncover Fourth-Party Risks

Stop the domino effect. Extend risk monitoring beyond direct partners to include the vendors of your vendors, revealing hidden incidents within your extended supply chain.

“With HackNotice, our incident response team receives notices in real-time, and is able to immediately start their investigation, **when time is of the essence.**”
