

DARK WEB FORENSIC INVESTIGATIONS

Targeted Dark Web Investigations, Backed by Human Analyst Insight

Partnered with Innovative Organizations

Enhance your data breach, ransomware, and threat actor incident response.

Your business operates in an evolving threat landscape, where data breaches and ransomware attacks can have devastating consequences. HackNotice's Incident Analysis service empowers your team with in-depth investigations and ongoing monitoring of cyber incidents affecting your organization or supply chain.

We quickly identify the scope, scale, and source of the breach and capture detailed breach files and dark web evidence. Our team then presents the findings into a clear narrative supported by visual documentation. You receive a concise summary, breach screenshots, raw or formatted breach files, and detailed investigation insights.

Why HackNotice Dark Web Investigations?

- ✓ **Complete Visibility:** Leverage unmatched access to dark web sources, enabling comprehensive reporting.
- ✓ **Rapid Clarity:** Immediately understand your risk through clear summaries, visual screenshots, and breach data.
- ✓ **Actionable Insights:** Detailed evidence to guide your remediation, compliance, and risk management efforts.

Powerful Executive Summaries

Receive a comprehensive summary of the breach, threat actor communications, ransomware event details, and any associated compromised data.

Detailed Investigation Report

Complete analysis including technical findings of all compromised data, associated threat actors/ ransomware gangs, and other potentially affected entities.

Visual Evidence & Raw Data Breach Files

Gain full visibility into compromised data, along with screenshots of dark web publishing and any additional verified breach components.

Supply Chain Threat Insights

Investigate vendor, partner, and third-party compromises affecting your business to stay ahead of supply chain threats and mitigate breach interconnection.

“With HackNotice, our incident response team receives notices in real-time, and is able to immediately start their investigation, **when time is of the essence.**”

Power up your dark web investigations today.
